

Eagle 1000

The Eagle 1000 note counter is available in either mixed mode, single mode or separation mode.

It is possible to choose between face, back or orientation, and the Eagle is simple and easy to operate.

Secure and reliable, Eagle 1000 offers excellent counterfeit detection with UV, MG, MT, Colour and IR analysis.

The Eagle 1000 is equipped with currency software capable of accepting USD, Euro and, as an option, local currency.
