

# TicketPay

[Just the ticket for eliminating hopper problems]

**ThomasPay**

With TicketPay all cash wins are printed on standard slot tickets. Tickets are dispensed from an add-on printer assembly that works seamlessly with all cc-Talk or SAS-based machines. As with all ThomasPay applications, TicketPay is offered with a choice of configurations to meet the operational needs and budget requirements of every site operator.

**GAME PRINTER ASSEMBLY**

## Every game equipped with a printer assembly

- Printer assembly consists of the Transact 950 printer and Sentinel Dongle that is synchronized with either the cash desk unit or the PayStation
- Connects to the cc-Talk master port and the data port to control all credit and payment devices
- Sentinel Dongle insures proper coin-in diversion and converts hopper payout to a printed ticket
- Provides to-the-penny float/payout audit accuracy

**CASH DESK REDEMPTION**

## Low-cost – high security counter ticket validation unit

- Synchronized with all on-site printer assemblies
- Insures that only tickets issued on-site are validated
- Will not pay duplicate tickets
- Full audit capability
- No external PC or system knowledge required
- Barcode scanner, operating system, security control, and display all contained in one compact unit
- Outputs to POS terminal or management system

**OPTIONAL AUTOMATED PAYMENT**

## Fully featured PayStation provides ATM-level cash security

- Automated payout of all tickets
- Sentinel Dongle synchronizes each printer assembly to insure tickets are legitimate and not previously paid
- Captures all presented tickets and payment data for audit
- Touch TFT steps player through easy payout process
- TicketPay+ offers a networked solution that compares presented tickets to the ticket data base to validate payment

**TicketPay from Thomas...secure and easy to use...like all Thomas products.**

**TicketPay. Highly secure. Easy to use. Right-sized for every operator.**
