

**VNE TOKEN MACHINE**

The VNE Token Machine is an armoured, secure and reliable coin / token change machine. It provides simple and dependable solutions where banknote and coin change to coins or tokens is required.

It can be used simply to change banknotes to coins or tokens, as well as to change higher value coins in for lower value coins or tokens out.

The Token Machine can even give the change in coins by using a pre-programmed option.

Fitted with a reliable bill validator pre-equipped with an anti-fraud device, the Token Machine provides the utmost in security whilst being flexible and operator-friendly.

A mixture of denominations is possible, including note / coin denominations, two different denominations of coins or one denomination of coin and one kind of token.

The value of specific tokens can be chosen and set up by the customer.

**FEATURES**

- 2 universal hoppers which can be set up according to customer needs
- Independant set up for each hopper, coin / token value in 1 cent steps
- Machine refill possible without opening the machine
- Wall or ground anchorage available
- Personal artwork available
- LCD user display
